

Agile Manifesto

We are uncovering better ways of developing software by doing it and helping others do it.

Through this work we have come to value:

- Individuals and interactions over processes and tools
- Working software over comprehensive documentation
- Customer collaboration over contract negotiation
- Responding to change over following a plan

That is, while there is value in the items on the right, we value the items on the left more

Agile Manifesto

Individuals and interactions over
processes and tools

Working software over
comprehensive documentation

Customer collaboration over
contract negotiation

Responding to change over
following a plan

Agile Manifesto Principles

12 principles behind the agile manifesto

Split into 3 groups:

- Regular delivery of software
- Team communication
- Excellence in design

Regular Delivery of Software

The highest priority is to satisfy the customer through early and continuous delivery of valuable software

Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale

Working software is the primary measure of progress

Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely

Team Communication

Business people and developers must work together daily throughout the project

The most efficient and effective method of conveying information to and within a development team is face-to-face conversation

The best architectures, requirements, and designs emerge from self-organizing teams

Build projects around motivated individuals. Give them the environment and support they need and trust them to get the job done

At regular intervals, the team reflects on how to become more effective, then tunes and adjusts its behavior accordingly

Excellence in Design

Continuous attention
to technical excellence
and good design
enhances agility

Simplicity, the art of
maximizing the amount
of work not done,
is essential

Agile processes
harness change for
the customer's
competitive advantage
